

Give peace a chance!

Many countries have problems with conflicts. I run websites about such countries. Raise hopes for peace with tourism? Tourism brings money and can create understanding and friendship. If there are travel warnings, we do not offer any trips. However, we publish information about the country.

Human rights are not widely accepted in many countries, but they are popular travel destinations. We allow ourselves critical posts on our website and believe that tourism can improve changes, which are good for everyone.

- Investment in tourism instead weapons
- Set up a dialogue
- Respect and equal rights
- Religion for Peace
